PUMPS REQUIRED FOR WATER SUPPLY TO KARAPUR CAMP.

GENTLEMEN,

Please be good enough to intimate your best prices for delivery, f.o.r., Mysore for *Two pumps each capable of lifting 60 gallons of clear water per minute against a head of* 130', and conforming to the specifications attached.

It should be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions :—

Withdrawal from the quotation after it is accepted or failure to make the supply within the specified time or according to specifications will entail cancellation of the order and purchases being made at your expense from other sources in addition to the levy of a penalty of 3 per cent of the value of the order as and by way of liquidated damages. In such an event, the Stores Purchase Committee reserve the right to remove your name from the list of approved firms.

The quotations should be superscribed "Quotations for Pumps required for Water Supply to Karapur Camp" with the enquiry Number.

This enquiry will be closed on the 22nd of September 1938.

SPECIFICATION OF THE PUMPS REQUIRED FOR WATER SUPPLY TO KARAPUR CAMP.

The pumps should each be capable of lifting 60 gallons of clear water per minute against a head of 130 feet.

Each of them should have a fast and loose pulley along with an outer bearing and a belt shifting arrangement.

The pumps are to be driven by an 8 H. P. Oil Engine with us installed at an altitude of 2,000 ft. and at a place where the temperature goes up to 100°F. The speed of the engine is 550 R.P.M. and it has a pulley 20" in diameter and 12" face.

Pumps capable of being driven by this engine and with the existing pulley will be preferred. If the pulley on the engine shaft requires to be altered, the cost of the new pulley should also be included in the quotation. The diameter of the engine shaft is 2½".

The pumps should be delivered at Mysore before the end of October 1938 *and preference will be given to quotations for delivery from ready stock.*

The pump should be complete with necessary foot valve, sluice valve and reflex valve as well as necessary pressure and vacuum gauges.

The shaft of the pump should be of special steel and it should run in ball or roller bearings.

The impellers should be of bronze, and preference will be given to pumps that have renewable neck and wearing rings. It should however, be of the fully balanced type without thrust pads, etc.

Yours, faithfully,
T. RANGASWAMI,
Secretary,
Stores Purchase Committee.
